Emergency management reported golf-ball to baseball sized hail along FM 779 near the county line.

A dry line, a warm front and a surface low pressure center all came together to produce a severe weather set-up during the late afternoon and evening hours of April 11. One long-lived supercell produced a multi-million dollar hailstorm across the northern suburbs of the Dallas-Forth Worth Metroplex. This storm produced grapefruit sized hail in Denton and softball sized hail in Wylie. At least 80% of the town of Wylie was damaged by the hail.

Page 8 of 19 Printed on: 07/08/2016

Date/Time Deaths & **Event Type and Details** Location Property & Injuries Crop Dmg Approximate path of severe hail swath in the Dallas/Fort Worth Metroplex on the afternoon and evening of April 11th. Wylie, Texas had the largest hail, where an estimated 80 percent of homes and businesses in Wylie suffered some sort of damage from quarter to softball sized hail. 04/30/16 00:37 CST 1 1M Flash Flood (due to Heavy Rain)
04/30/16 01:30 CST 0 Source: Broadcast Media

Nearly 7.5" of rain fell over Palestine in about one hour causing flooding across the city. Cars were flooded in downtown Palestine. Newspapers also reported that businesses and homes in low-lying areas across the city were flooded and damaged. A total of 35 homes sustained major damage and 3 businesses in Old Town Palestine were damaged, the railroad track at Sycamore and Gillespie streets were washed out. Flooding was also reported at Loop 256 and Highway 84 on the east side of Palestine. To the southwest of Palestine, part of Shamrock Drive was washed out.

Direct Fatalities: M30VE

A warm front and a dry line combined to produce another round of severe weather across the region. Three tornadoes occurred on April 29th producing relatively minor damage equivalent to EF-0 damage. The big story during this period was the 6 flash flood fatalities in the Palestine area in Anderson County on the night of the 29th.
